

Fraud Retro Study

SentiLink offers a free retro study to measure the amount of synthetic fraud and ID theft impacting your business.

BENEFITS

Quantify the Problem

Example: 3% of applications used stolen identities and 1% used synthetic identities.

Review Specific Cases

Example: This applicant used an SSN that doesn't belong to them.

Value SentiLink

Example: SentiLink can catch 80% of synthetic identities with 90% precision.

THE RETRO STUDY PROCESS
