Maximize Checkout Conversions While Keeping Fraudsters at Bay

ACI® Fraud Management™ is a real-time, multi-layered fraud management solution designed to meet the requirements of eCommerce merchants and payment service providers (PSPs).

With mobile and online commerce growing rapidly, merchants need an agile, flexible fraud management solution that is capable of evolving and scaling with their business. A solution that enables genuine orders and supports business expansion, while reducing fraud losses and minimizing costs. A solution that delivers industry-leading results for merchants across different vertical markets and around the globe.

Delivered as a managed service and including support from an expert team of risk analysts, ACI Fraud Management helps merchants to sell more and lose less.

Managing Fraud for Growth

ACI Fraud Management provides instant, accurate decisions for online and mobile transactions, across all geographies and payment types. The solution is highly flexible and combines multiple layers of control to deliver a fraud prevention strategy tailored to your needs.

Advanced machine learning models, predictive and behavioral analytics, customer profiling techniques, tailored rules and global fraud intelligence are used in combination to accurately identify genuine transactions and isolate potential fraudulent ones.

ACI Fraud Management enables you to balance low fraud and chargeback rates with strong checkout conversion and revenue growth. Through advanced analytics and positive profiling techniques—and with the support of a team of expert risk analysts—our fraud management solution delivers increased acceptance rates, reduced false positives and a frictionless payments experience for your genuine customers.

An interactive, self-service, business intelligence portal provides an invaluable window into transaction data, enabling you to analyze individual transactions, continuously monitor performance and refine your fraud prevention approach to stop fraud faster. Transactions can be monitored in near-real time or viewed for longer term trends, providing insights that can be used to improve the performance of your internal fraud teams, and to develop marketing strategies and business expansion plans.

Our sustained investment program ensures that ACI Fraud Management remains fast, robust and can scale to meet the challenges merchants face as eCommerce and multi-channel demands continue to evolve. Investing in the latest technology and third-party connections enables us to deliver best-in-class, agile solutions that support the business success of our customers.

Unrivaled Intelligence

ACI Fraud Management is underpinned by a wealth of merchant fraud intelligence, combining powerful global consortium data with information from partners and other third parties, as well as negative market intelligence and vertical market databases. This insight is used to help merchants build better customer profiles, identify emerging fraud trends, enrich the performance of our machine learning models and enable fast action to prevent fraud loss.

Our retrospective screening capabilities also enable you to re-screen live orders against new fraud intelligence received into the ACI database. This means you
