
Logix Federal Credit Union Freed Their Team From Manual Research and Prevented \$3 Million in Losses

Challenges

Logix struggled with inefficient manual document verification processes that slowed loan approvals and increased fraud risk.

Solution

Logix implemented Inscribe's AI-powered document verification technology to automate review processes and enhance fraud detection capabilities.

Results

Logix achieved faster loan processing times, reduced operational costs, and significantly decreased fraudulent applications while improving member satisfaction.

"We started using Inscribe in late April last year. And in just eight months, we saw potential loan fraud savings of over \$3 million and countless ID theft saves."

Matt Overin
Manager, Fraud Risk Management
